

fuelling equipment services

Our skilled test engineers

will be pleased to offer the following services:

The services of our skilled test engineers are available to interface with the operational requirements of your Aircraft Refuelling Operations. Testing can be done in-situ making use of our mobile test facility at a mutually convenient time and location or at our purpose built facility at our works.

Our Service Department will liaise with your Fuelling Services Management to co-ordinate the test and inspection of your vehicles allowing minimum downtime of your refuelling plant.

Meter Test and Calibration, Hose and HEPC Pressure Testing

- Meter calibration on all levels from small static ground fuel pump/meters to bulk fuel transfer meters
- Working to all specifications within the Commercial and Ministry of Defence industries
- Calibration of a variety of mechanical meters through to the latest electronic meters
- All meter-proving certificates are traceable back to National Weights and Measures
- Records of each meter calibrated are stored on our database.

New meter installations, overhauls, rebuilds and conversions

- New fuelling meter installations
- Fuel meter overhauls, rebuilds and conversions e.g. Kilograms to litres etc.
- Annual preventative maintenance programs are available tailored to individual customer requirements
- Fuel hose and HEPC pressure testing with certificates supplied, traceable to National Weights and Measures and recorded on our database
- Primary and Secondary Pressure Control testing and System testing of Refuelling vehicles and Hydrant Dispensers

All these services can be offered as a complete package on an annual service contract basis, run and monitored by our service team to allow minimum paperwork and downtime to the customer or separated into single service tasks on an ad hoc basis as customer requirements dictate.
